

Survey about Perceptions of Visual Impairments

What is this?

This is a survey regarding the development of a gamified experience that promotes the feeling of empathy towards people who are Visually Impaired. The questionnaire is composed of 4 sets of questions, and it takes 5 to 10 minutes to respond. The questions will collect some anonymous information (such as your gender, age and vision condition - sighted people also welcomed!), as well as ask the way you feel about certain issues the visually impaired community faces.
