

Survey about Perceptions of Visual Impairments

What is this?

This is a survey regarding the development of a gamified experience that promotes the feeling of empathy towards people who are Visually Impaired. The questionnaire is composed of 4 sets of questions, and it takes 5 to 10 minutes to respond. The questions will collect anonymous information (such as your gender, age, and vision condition - sighted and visually impaired people welcome!), as well as ask how you feel about certain issues the visually impaired community faces.
